AGILE

I leverage agile, and have 6 months experience in an agile environment. I have experience in it's principles, and can easily thrive in an agile environment.

OTHERS

Git/Github/Gitlab
Cypress/mocha/chai/supertest
Shell Scripting
MVC

EXPERIENCE

REPRESENT

Full Stack Developer Contractor
Started October 1, 2018

Company Bio:
Represent is a new software development team developing technical solutions for marginalized communities. We advocate to bridge the gap of inequality in our society.

My experience:
I worked on projects that are in my expertise, and made a learning plan to learn new technologies to benefit the company. I worked hard to integrate, and learned to work on a team that was remote.

PROJECTS

CODE-BANK

Demo: https://www.youtube.com/watch?v=uF7JXXSvz4o
Live Site: http://code-bank.surge.sh/
https://github.com/AlexanderCarlston/CODE-BANK

- Had 10 days to work in an unfamiliar environment, after those 10 days i presented a demo to an audience.
- Centralized platform for gists, with an emphasis on reusable code.
- CRUD UI, my own api, Github's API (OAuth), and my NPM package
- Had to learn Vuex, Shell Scripting, Github OAuth, and more libraries.

Personal Site (Vue)

https://github.com/AlexanderCarlston/Personal-Site

- My first Vue project, so not mobile friendly.
- I had to incorporate complex code in to this, which shows my resourcefulness.
- I used canvas, which was extremely hard and took a lot of learning.
